

Arkan Oil Products

Two major trading portfolios

Our business focus can be classified into two major trading portfolios namely, Vegetable Oils and Fats. We has also set its forays into non-edible fats and palm oil cleavages that caters to the growing needs of various industries including Soap making and Oleochemicals.

Our range of products include:

- Consumer-packed edible oils consisting of vegetable cooking oils such as RBD Palm Olein;
- Soft Oils such as RBD Soya Bean, RBD Sunflower Oil, RBD Corn and RBD Canola Oil,
- Lauric Oils such as RBD Palm Kernel Oil and RBD Kernel Olein, Crude and Refined Coconut Oil,
- Vegetable Ghee and Industrial-pack Margarine, Bakery Fats and Shortening;
- Milk products such as Evaporated and Sweetened Condensed Milk;

By-products such as PFAD, PKFAD, CFAD for the Soap Industries, Various types of Laundry and Toilet Grade Soap Noodles, Multipurpose and Toilet Soaps.

The technical specifications for Sunflower Oil

- The specific density (AT 20c): 0,918 - 0,920
- The refractive index (AT 40c): 1.467 - 1.469
- Transparency of oil, max: 10 fem
- Acidity mg KOH % gm oil max: 0,1 - 0,6
- Peroxide value mMol/kg oil max: 0,1 - 0,7
- Color value iodine, mg max: 4
- Iodine value (WIJS): 110 – 144
- Moisture & Volatile % max: 0,06
- The saponification value, mg KOH/gm oil: 188 – 194
- Phosphorus containing matter (P2O5): Negative
- Non-fatty Impurities, % max: Negative
- Coloring materials, allowed to ad:
- According to the international standards artificial flavors,
- Allowed to ad: According to the international standard
- Anti oxidants: 200mg/kg but galate not more than 100mg/kg
- Preservative agent: According to the international standards
- Anti foaming: 10mg/kg
- Anti crystallization: 1250mg/kg
- Soap content: 0,005 max
- Unsalable impurities % mass: 0,5 max
